

Schoology for Students

Schoology is like your child's "virtual" desk.

Within Schoology, you will see "COURSES".

These courses can be thought of as "FOLDERS" inside your child's desk, that are for each subject area.

Below is an example of what your child will see when they log into Schoology.

A way to think about it is... If (in the classroom), the teacher says "Boys & Girls, please get out your **"MATH FOLDER"**

That translates into "Schoology Speak" as... please click on your **"MATH COURSE"**.

Boys & Girls,
please take
out your
math folder

OK, I need to
click on my
math course.

- Within each course are the "ASSIGNMENTS AND/OR ACTIVITIES" for your child.
- Think of these as the "VIRTUAL" version of the "PAPER DOCUMENTS" within each folder.
- HEY, no more losing track of all those paper assignments! LOL

MATH: Beliveau - 3rd Grade
Cherokee Elementary
